Technology needs:

Logic School students will need access to a computer with the full Office suite (specifically Word and PowerPoint) to complete a few projects during the year. Please note that Chromebooks do not run full Windows and have caused some students difficulty when trying to use them for school needs. Also, iPads do not have some formatting functionality in Word. Families may download the Office 365 suite of products for free using their student's PCS email address. It is not necessary for Logic School students to have their own computers.
