

School Awards 2019-2020

Math Olympiad Awards

Providence Grammar students in Grades 4-6 participate in Math Olympiad, a monthly math competition in which the students solve unusual and difficult math problems that stimulate creative thinking and problem-solving. Over 200,00 students compete in Math Olympiad worldwide. The top 50% are awarded patches. We are excited to announce that 32 of our students will receive a patch this year! The top 10% receive a silver pin commemorating their achievement. The top three students from Providence will also receive a trophy.

Congratulations to the 2019-2020 winners!
